-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Information Disclosure Statement filed on 10/20/03 has been received.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fulks et al (U. S. Patent no. 6,324,845) in view of Grabb et al (U. S. Patent no. 3,768,366).

Fulks et al discloses:

A vacuum operated brake assist unit 20, vacuum pump 12 (see also column 3 lines 15-18), secondary pump 62

Fulks et al does not disclose the assisting pump as an air pump for engine operations.

Grabb et al teaches the use of an air pump (see figure 1 pump12) for engine operations as a secondary pump. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use an air pump for engine operations as a secondary pump as taught by Grabb et al in the system of Fulks et al as it reduces the number of pumps needed. This saves weight as well as reduces costs.

Regarding claims 3,4,8 and 9, Fulks, as modified does, not disclose the pumps being placed in a common housing or run by the same motor. Such setups are well known in

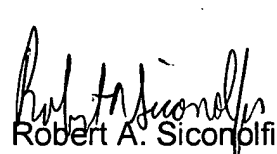

Art Unit: 3683

vehicles, especially in braking systems. It would have been obvious to one of ordinary skill at the time the invention was made to use a common housing and motor as it eases installation, reducing the number of parts needed, and reduces costs.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Siconolfi whose telephone number is 571-272-7124. The examiner can normally be reached on M-F 10 am-3 pm.
